

A revolution in aviation rescue technology...

The ARU-320T ARFF *TRIPLE THREAT*

Never before has so much capability been available in such a compact and cost-effective package. The new ARU-320T Triple Threat not only offers triple agent fire suppression, but full rescue and breathing air capability too. Brilliant scene lighting with a 20' Night Scan and 2 portables, hydraulic extrication systems, utility compressed air, air bags, and 20 KVA of electrical power give you the tools you need to shave minutes off extrication time and make the most of that first Golden Hour. It's so compact and highly mobile that you can get it off-road where crashes often take place, or into hard to protect, vulnerable terrorism targets like airport parking garages, tunnels, and even inside terminal buildings. The *Triple Threat's* breathing air compressor and cascade system can either run at the scene from its diesel-powered generator, or plug into a 220V landline back at the station for quiet, pollution-free operation.

Whether it's runway disasters, multi-faceted rescue operations, breathing air resupply, fire scene illumination, or disaster scene power, you'll find the new ARFF Triple Threat to be the most versatile piece of equipment in your airport fleet.

Power Train

- 44 HP Lombardini four-cylinder diesel engine with 20 KVA Getec alternator

Triple Agent Fire Suppression

- 100 or 300 gal. AFFF tank
- 500 pound dry chemical tank (PKP or SB) & one 400 cu. ft. DOT 3AA nitrogen cylinder
- 150 pound Halotron tank
- Automatic adjustable oscillating rear-mounted foam turret
- One 100' single-agent hand line reel
- One 100' dual-agent hand line reel

Breathing Air Compressor & Reel Options Available With Three DOT or ASME Tanks

- 9 cfm 5000 psi 7.5 HP three-phase electric motor- dual power source available
- 300' low pressure breathing air reel for confined space operations

Two-Position SCBA Refill Containment Options

- Class II Eagle Air Sidewinder Steel Containment
- Class IV American Airworks Aluminum Containment

Hydraulic Extrication Options

- Single or double line 220V hydraulic pump with one or two 100' Hannay reels
- Combination cutter/spreader and 18'-40" ram standard- others optional

Lighting Options

- Two front-mounted, portable Havis-Shields 900 watt Magnafire 3000's
- 17' Nightscan mast with four 900 watt Magnafire 3000 lights

Utility Compressed Air

- One Hannay 150' compressed air reel

Air Bags

- Two Vetter 26-ton airbags with hoses and Command Control Console
