- LED Interior & Platform Lighting
- LED Ground Proximity Lighting
- Deluxe Automotive Interior With AC

The new CRV Mini-Trucks, contrary to popular trends, are getting smaller and smaller. So small they can drive right through the double sliding glass doors of an airport terminal, motor on down city sidewalks, or go anywhere in the tightest, lowest parking garage. But more importantly, they bring to those tight spaces astonishing power, capability, and versatility. It's one of those things you just have to see to believe. Available in gas, diesel, and electric models.

BADGER[®] SPECIFICATIONS

Chassis

| | |
|---------------------|-------------------------|
